

Sandip Ganava

Full-Stack Developer | MERN Stack & WordPress | 3+ Years of Experience

Summary

Full-stack Developer with 3+ years of hands-on experience specializing in WordPress, MERN Stack (MongoDB, Express.js, React, Node.js), and React Native development. Skilled in building dynamic web applications, custom WordPress themes, and plugins tailored to client needs. Experienced in developing RESTful APIs, integrating databases, and creating scalable backend services using Node.js. Proficient in working with relational and non-relational databases such as MySQL and MongoDB.

Strong expertise in Node.js and React Native for crafting intuitive, high-performance mobile and web interfaces. Adept at implementing modern back-end frameworks, asynchronous programming, and efficient deployment pipelines. Focused on writing clean, maintainable, and well-structured code to deliver seamless user experiences across platforms.

Core Skills

- Front-End Development: React, React Native, Next.js, JavaScript (ES6+), HTML5, CSS3
- Back-End Development: Node.js, Express.js, REST APIs, Authentication & Authorization (JWT, OAuth)
- WordPress Development: Custom Themes, Custom Plugins, API Integration, Performance Optimization, Security Hardening
- Database Management: MongoDB, MySQL— schema design, indexing, and query optimization
- Mobile App Development: Cross-platform development using React Native, Firebase integration, Push Notifications
- Deployment & DevOps: Vercel, Netlify, cPanel, Git/GitHub, CI/CD, Server Management
- Additional Skills: Strapi (open-source headless CMS), Third-party API integrations, Payment Gateway(razorpay, stripe)
- Soft Skills: Problem Solving, Team Collaboration, Clean Code Practices, Agile Development

Professional Experience

- Developed and maintained custom **WordPress websites**, including custom themes, plugins, and WooCommerce functionality.
- Built several **MERN stack applications** featuring secure authentication, dynamic dashboards, and RESTful APIs.
- Designed and launched **React Native mobile apps** with real-time data updates, Firebase messaging, and optimized performance for Android & iOS.

- Integrated multiple third-party services (e.g., payment gateways, SMS/Email APIs, Google APIs) to enhance functionality.
- Optimized website and app performance through caching, lazy loading, database tuning, and SEO best practices.
- Deployed and maintained applications on **Vercel**, **Netlify**, and traditional hosting, managing end-to-end delivery.
- Collaborated with clients and teams using Git-based workflows and Agile methodologies to ensure timely and quality releases.

Key Projects

Panchal Samaja App:

- **Description:** A community app with member directory, village listings, business listings, committee.
- **Tech Stack:**
Backend: Node.js
Frontend: React Native

EMS:

- **Description:** A web app for employee CRUD, role-based access, attendance tracking, and department management.
- **Tech Stack:**
Backend: Node.js
Frontend: Reactjs

E-commerce Website:

- **Description:** A custom e-commerce site with product catalog, checkout flow, payment integration, and SEO optimization.
- **Tech Stack:** WordPress, WooCommerce, HTML5, CSS3, JavaScript, cPanel, Razorpay/Stripe

Global Travel Agent:

- **Description:** A SaaS travel platform where users register, buy packages, and view sponsored listings.
- **Tech Stack:** WordPress, WooCommerce, Custom Plugins, JavaScript, PHP, Payment Gateway Integration
